

The Finance Forward 365 total technology solution

High-touch user support, modern workplace technology and managed cloud services tailored to financial services

The **Finance Forward 365** total technology solution

Financial services firms know to focus their energies on strategies that will grow the business, improve operational efficiencies and deliver a new level of experience for their customers.

Business size, culture and the critical technology needs of financial services mean that IT outsourcing has always been commonplace. With the accelerated pace of technology change, security risks and regulatory burden, firms increasingly need providers who are specialists in their specific business to solve their technology challenges.

Modernising a firm's IT platforms and infrastructure takes time and resources. It also requires the confidence to know you are getting the best possible solution, service and support available for your sector.

A Lanware-managed cloud solution will transform your business securely – and quickly. You'll have future-proofed technology that is flexible and can grow with the firm.

Simple to use, you'll have the peace of mind that comes from knowing you are supported by experts with over 20 years of experience.

Why choose Finance Forward 365?

FAST: Quick & painless set up

EFFECTIVE: Fully integrated and adapted to your business requirements

VALUE: Cost effective from day one. Pay as you go

SIMPLE: Transform the way you work, where you work

SECURE: Manage and mitigate cyber risk

SUPPORTED: By an experienced local team who've worked with financial services for over two decades

The Finance Forward 365 total technology solution

- High-touch user support and a flexible managed cloud platform specifically for financial services
- Modernise your workplace technology, securely migrate to the cloud and rapidly transform your financial services business

FINANCE FORWARD 365

Start ups or fast-growing or established small financial firms

A simple, quick and cost effective all-encompassing managed service with end user support, standard workplace technology, connectivity and Microsoft 365 cloud services.

FINANCE FORWARD 365 PLUS

Established Financial firms with more complex technology needs seeking to adopt a pure public-cloud solution.

All the features of Finance Forward 365 but with greater support for more financial applications, disaster recovery and advanced cyber security controls.

FINANCE FORWARD 365 HYBRID

Established financial firms with an existing technology foot-print, higher compliance requirements and variable appetite for the public cloud.

An optimum balance combining the flexibility of the public cloud service with the transparency and increased service levels of a private cloud environment.
