

Project Manager

Job Description

At Lanware, we are a leading technology service provider to the financial world. We enable our clients to drive their business by being their trusted technology partner. Our aim is always to deliver quality in projects and service without compromising on the flexibility and clients demand. We're highly selective in our people, the technology we use, the industry and our clients. Our people are vital in driving us to be the market leader by providing the highest standards in delivery and service.

Lanware's Project Management Office (PMO) adheres to industry best practice, conforming to internal processes and delivers results in a consistent manner. Lanware delivers quality solutions across its portfolio capitalising on existing successes and standards.

The PMO has a critical role in the company to support not only client projects, but also pre-sales and internal delivery. The key focus will always be the successful delivery of transition and transformational projects. The PMO are key in the continuous improvement of professional services standards and practises to ensure we keep aligned to our clients' expectations.

Project Managers are responsible for delivering projects in accordance with industry leading standards of quality and professionalism.

Ideal candidate profile

- ⊗ A professional and dynamic approach to client engagements with the ability to build strong relationships through excellent project delivery and client management;
- ⊗ A thorough understanding of strategic technology solutions in a business context;
- ⊗ The promotion of best practise, process, compliance and continuous improvement;
- ⊗ The management of project budgets and commercial awareness through project delivery;
- ⊗ The ability to be flexible and committed to a strong work ethic with drive to continually go beyond the status quo;
- ⊗ The demonstration of strong communication skills in the management of project stakeholders, both client and internal teams;
- ⊗ A proven track record of project delivery, evidencing and understanding the controls, and management of the project lifecycle;
- ⊗ An ability to adapt style and be confident in dealing with people at all levels in an organisation;
- ⊗ A desire to learn and develop yourself within the Lanware business and to build on the company future.

⊗ Key responsibilities

- ⊗ Responsible for the budget, planning and delivery of transition and transformation infrastructure projects using onsite and virtual project teams;
- ⊗ Strong communication with proven skills in the interaction with clients and internal stakeholders;
- ⊗ Supporting sales with proposals, identifying commercial opportunities, and working with technical teams to provide quotes to clients;
- ⊗ Working with the delivery team to identify opportunities in the client roadmap;
- ⊗ Monitoring the implementation and ongoing application of Lanware's information security management processes and governance procedures, including:
 - ⊗ Compliance with company's policies and procedures and updates to these;
 - ⊗ Management and mitigation of risk in relation to new tasks/processes in terms of systems, technology, staff competence and health and safety;
 - ⊗ Prompt and effective response in the event of any IS incident.

Education/Qualifications

- ⊞ Must have a higher education qualification;
- ⊞ Must be PRINCE2 or Agile certified (other certifications will be considered).

Additional information

- ⊞ All candidates must be willing to work in Central London;
- ⊞ The role will include travel to client sites;
- ⊞ The role may necessitate some varied working hours to accommodate project work.
